Thank you for your business

NEVRON OPEN VISION for .NET

The complete .NET GUI Toolkit for Windows, macOS and Blazor WebAssembly application development with .NET

The suite features:

NOV CHART for .NET

NOV Chart for .NET is an advanced charting control for .NET, covering a vast feature set of charting types for presentational, business, scientific, financial, real-time monitoring, statistical and other types of applications.

NOV BARCODE for .NET

NOV Barcode for .NET helps you embed barcodes in your .NET applications quickly and easily. The component is fully customizable and provides support for more than thirty 1D and 2D barcodes.

NOV DIAGRAM for .NET

NOV Diagram for .NET is a fully managed, extensible and powerful diagramming framework, which can help you create feature-rich diagramming solutions in WinForms, WPF, macOS and Blazor WebAssembly projects.

NOV GAUGE for .NET

NOV Gauge for .NET has extensive support for instrumentation widgets such as radial (circular) and linear gauges, knobs, indicators, and numeric displays. Those Gauge controls can be used to create user interfaces for dashboards, KPIs, dials, stopwatches, clocks, thermometers, LEDs, and simple indicators.

NOV RICH TEXT EDITOR for .NET

NOV Rich Text Editor for .NET can create all types of text documents such as contracts, invoices, reports, and others. The control can be used for rich text editing and input, automated document generation (RTF, DOCX, HTML, PDF), reporting, text document conversion, spell checking and others.

NOV GRID for .NET

NOV Grid for .NET is a high-performance Data Grid component for displaying and editing tabular data within your WinForms, WPF, macOS Blazor WebAssembly applications.

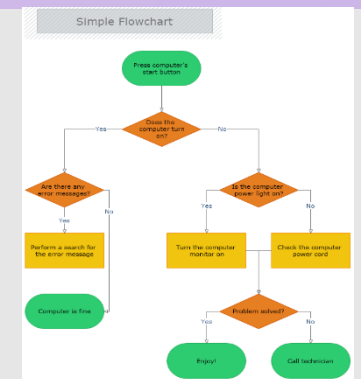

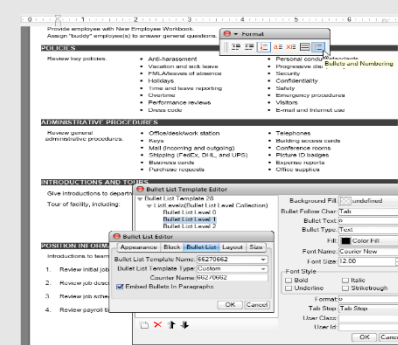

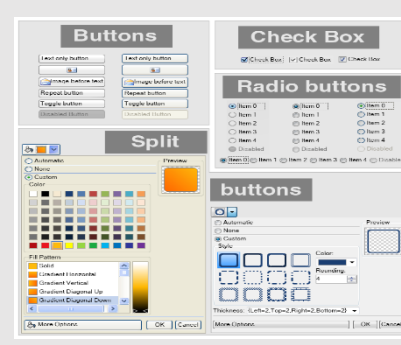

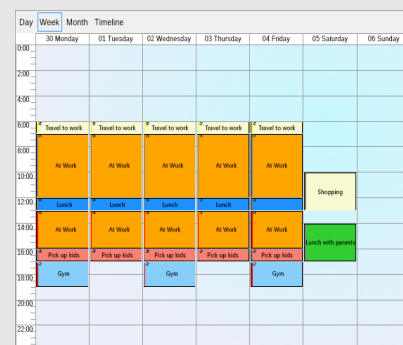

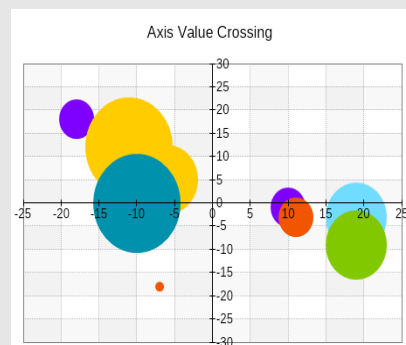

NOV SCHEDULE for .NET

NOV Schedule for .NET can help you display and organize events such as appointments, recurring meetings etc. in your .NET applications. It provides all the features of Microsoft Outlook Calendar and Google Calendar.

NOV UI for .NET

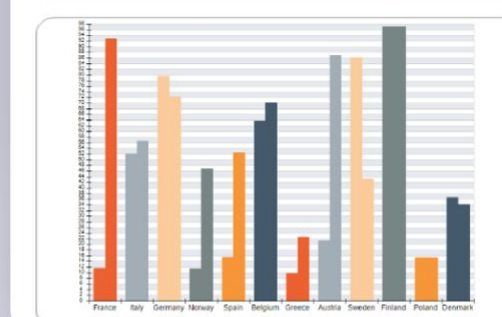

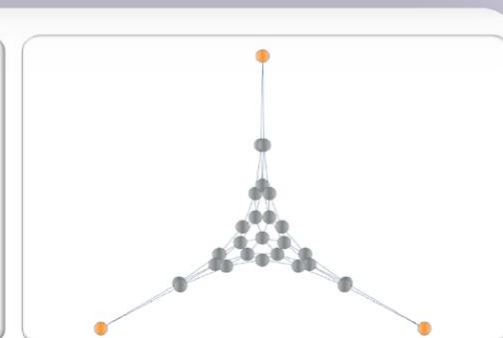

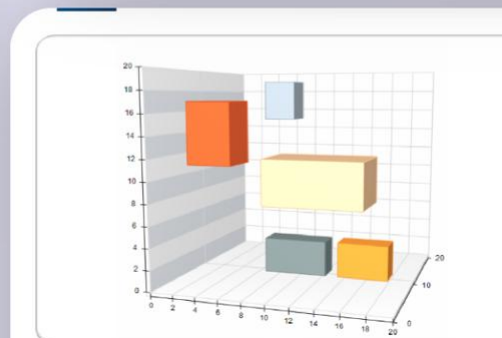

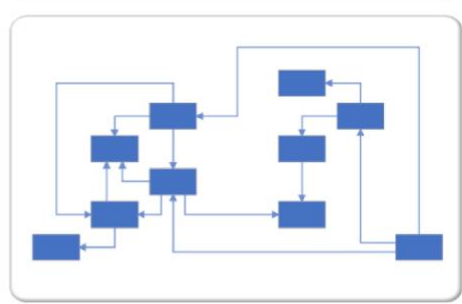

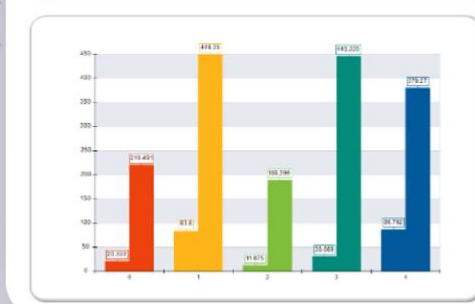

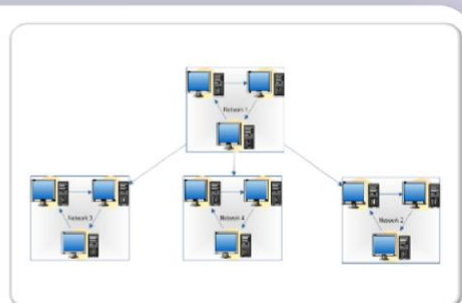

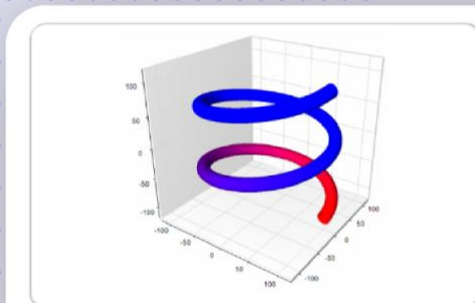

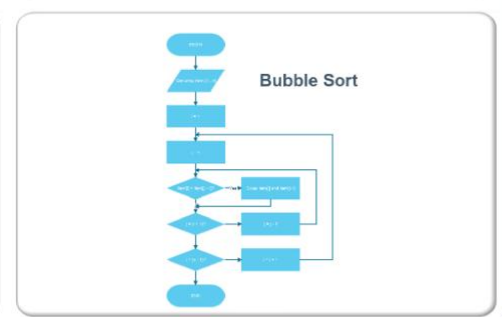

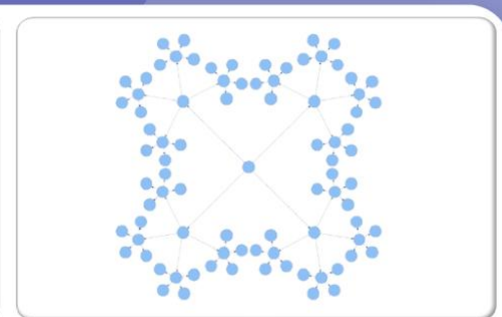

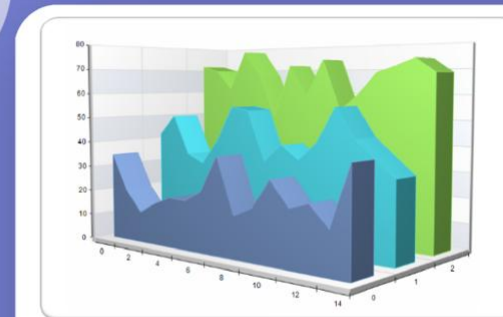

It contains a complete and feature-rich set of cross-platform User Interface controls, such as text box, label, color pickers, list, tree view, buttons, ribbons and others. With 70+ UI controls Nevron UI delivers all commonly used GUI elements.

Supported Environments:
Available Editions: Professional and Enterprise

NEVRON VISION for .NET

NEVRON VISION for .NET

The ultimate suite for creating .NET applications with powerful data presentation capabilities. The components in this suite can be used in any presentation, business, or scientific application that requires feature-rich and robust 2D and 3D data visualization capabilities.

The suite features:

NEVRON CHART for .NET

The unrivaled set of 170+ charting types, available “out of the box”, ensures that you never run out of charting features when you need them. Many of these can only be visualized with the Nevron Charting tool. Most of the charting types can be displayed in both 2D and 3D. Multiple charting areas, mixing 2D charts and true 3D charts inside a single canvas, advanced options for non-overlapping data point labeling, shapes and fine control over all aspects of data point appearance are just a few of the charting related features, that make this product stand in a class of its own.

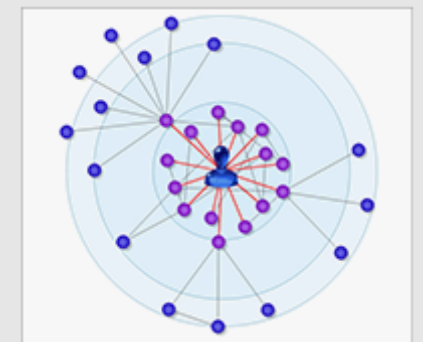

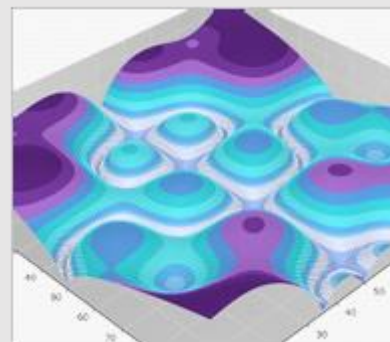

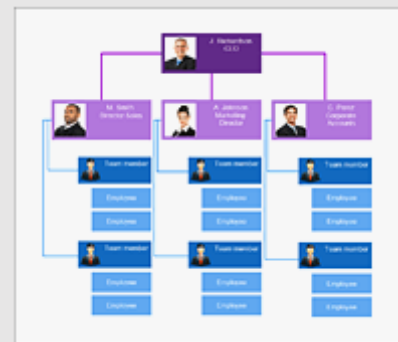

NEVRON DIAGRAM for .NET

Carefully crafted to meet diverse requirements and specific business needs, it provides flexible extensibility options, which will help you to integrate it perfectly in your project. Nevron Diagram for .NET contains a full range of advanced diagramming components for WinForms, ASP.NET and MVC application development that share a common diagramming API, document format and features. This helps you standardize your diagramming development across a wide range of .NET platforms.

NEVRON UI for .NET

Nevron User Interface for .NET is the only suite on the market with such remarkable render quality and speed. Explore a rich and powerful docking library, professional and extensible command bars, unique features such as skinnable forms, rich-text labels, modern fill effects (glass, gel), and much more designed to bring to your .NET applications the latest GUI standards and technologies.

Supported Environments: WPF, WinForm, macOS
Available Editions: Professional and Enterprise

NEVRON VISION for SharePoint

Nevron Vision for SharePoint delivers the web parts needed to author advanced reports and dashboards inside any SharePoint page - and what is best - you do not need to be a developer to do that. Delivers leading data visualization web parts for SharePoint 2007, 2010, 2013, 2016 and 2019.

The suite features:

NEVRON CHART for SharePoint

Nevron Chart for SharePoint is an advanced web part, which delivers a complete and unmatched set of 2D and 3D charting types, highly customizable axes, advanced data analysis, numerous tuning options, and stunning visual effects to your SharePoint sites.

NEVRON GAUGE for SharePoint

With Nevron Gauge for SharePoint you can create complex gauges, KPIs, Scorecards and Dashboards visually and directly in SharePoint 2007, 2010, 2013, 2016 and 2019 environment. It delivering a complete set of radial and linear gauges, numeric displays and state indicators, driven by pivot data aggregation.

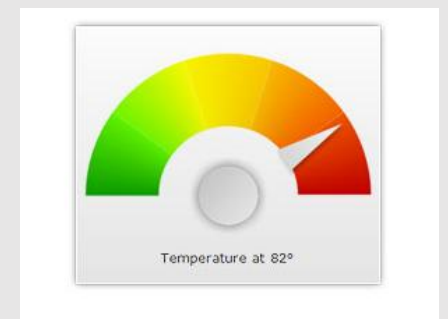

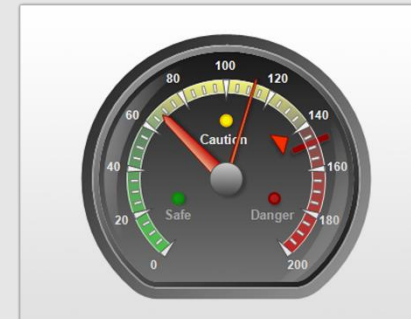

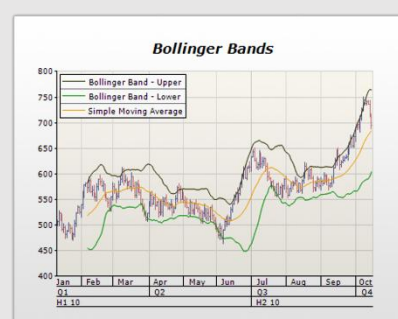

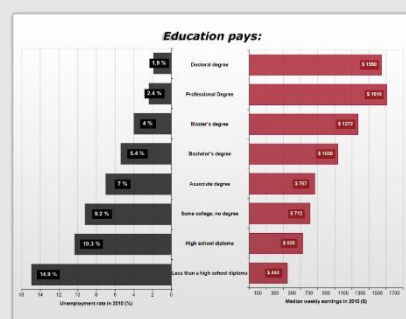

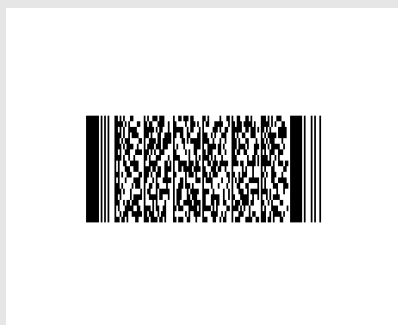

NEVRON BARCODE for SharePoint

Nevron Barcode for SharePoint delivers an easy and powerful way to display data driven linear and matrix barcodes directly inside SharePoint. It can display more than 30 1D and 2D barcode types.

NEVRON MAP for SharePoint

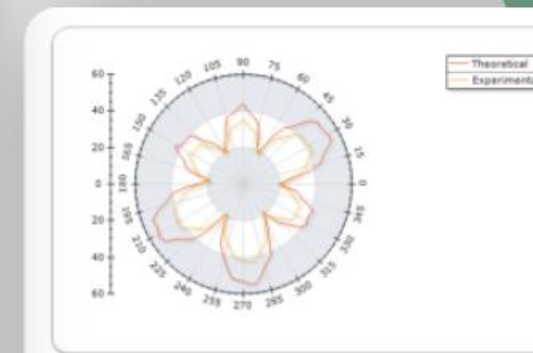

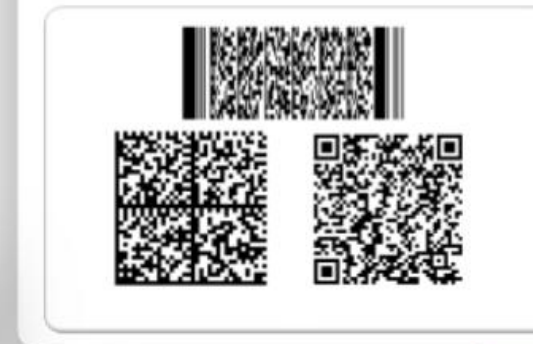

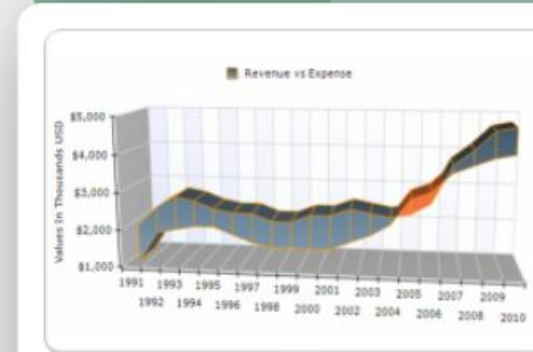

Nevron Map for SharePoint is an advanced web part for all versions Microsoft SharePoint. It is designed to provide an easy and powerful way to create choropleth maps that are tightly integrated with your data. The web part delivers an unmatched set of features related to visual quality, layout, data integration and data analysis.

Available Editions: Enterprise

NEVRON VISION for SSRS

NEVRON VISION for SSRS

The leading suite of data visualization report items for SSRS 2005, 2008, 2008R2, 2012, 2014, 2016 and 2017.

The suite features:

NEVRON CHART for SSRS

Neuron Chart for SQL Server Reporting Services (SSRS) is an advanced report item, which delivers a complete set of 2D and 3D charting types, highly customizable axes, tight data integration and unmatched visual effects to your reports. It also instantly improves your report authoring experience, with its polished visual editors, exhaustive and refined settings and well-organized structure.

NEVRON GAUGE for SSRS

Neuron Gauge for SQL Server Reporting Services (SSRS) delivers a complete set of gauge types, highly customizable axes, tight data integration and unmatched visual effects to your reports. It improves your report authoring experience with its polished visual editors, refined settings and well-organized structure.

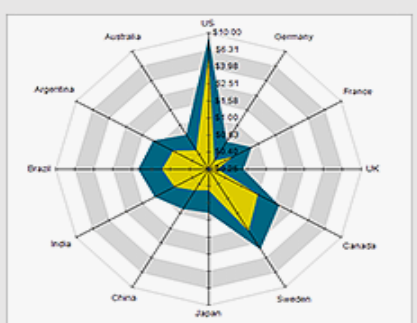

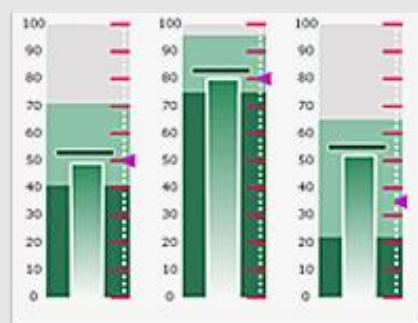

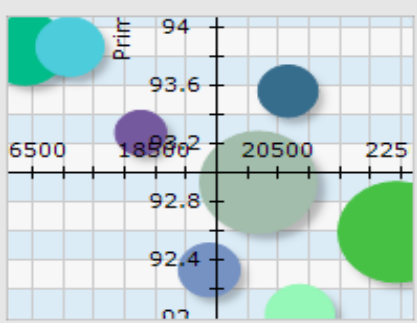

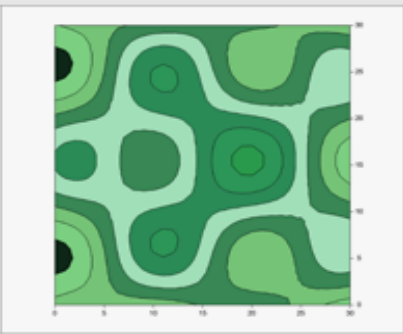

Supported Environments:  Microsoft SQL Server  Power BI
Available Editions: Enterprise

NEVRON BARCODE for SSRS

Neuron Barcode for SharePoint delivers an easy and powerful way to display data driven linear and matrix barcodes directly inside SharePoint. It can display more than 30 1D and 2D barcode types.

NEVRON MAP for SSRS

Neuron Map for SQL Server Reporting Services (SSRS) is designed to provide report authors with an easy and powerful way to create maps that are tightly integrated with the data. It features: Support for predefined and custom ESRI maps; Support for multiple layers, legends and titles; Advanced data binding; 22 map projections; Data driven filling and styling; Map zooming, scrolling and centering; Seamless integration with SQL Server Reporting Services.
